Sherry,

I spoke to my management (Darsi Foss) and we do not believe a meeting to discuss larger programmatic issues related to work the state does in Indian Country as part of the PECFA program at this time. As you know, our primary concern is the Tower Standard site and we do not have significant concerns at other sites in Indian Country at this time. We propose no meeting now but will continue monitoring of work in Indian Country and if problems are noted on a consistent basis, we will contact you and schedule the larger programmatic discussion at that time. Thanks for following up!

Best,

Judy

Judy,

A while ago (before heavy Tower Standard involvement), DNR and EPA had a discussion about work that the state does in Indian Country as part of the PECFA program. I think Darsi Foss wanted a larger discussion, perhaps with other states, to discuss larger programmatic issues with this work.

The need for that conversation got captured as part of our end of year process. It ended up being an action item and it is one of the ones that has lingered on. I think this is mostly because we have had our challenges with dealing with one such site, Tower Standard.

I'm writing to you to see if you can check with your management chain about whether the time is right to have such a meeting with EPA now or should we let this go.

Thanks much,

Sherry
